What is Kopernio?

A browser plugin that finds the best available PDF of an academic article while you browse.

Behind the scenes Kopernio will search (where possible) your university's subscriptions and open databases to find the best version of the paper for you.

**ONE CLICK ACCESS TO
JOURNAL ARTICLES**

**INTEGRATES WITH YOUR
LIBRARY HOLDINGS**

**TRAVELS WITH THE
RESEARCHER**

What is Kopernio?

HOW DO I USE KOPERNIO?

- Download the free Kopernio Plugin
- Select your affiliated institution – or ‘none’
- Create account
- ‘View PDF’ button will appear
- Click the ‘View PDF’ button to download the full-text PDF and start reading!

Kopernio integrates with library proxies and library authentication systems to retrieve research articles via library subscriptions. Kopernio always tries to source the journal article from the publisher platform first:

- publishers subscription & OA content
- your Kopernio search history
- repositories (e.g. institutional repositories)
- databases (e.g. JSTOR)
- pre-print servers (e.g. Arxiv)
- Google Scholar

Integrates with Web of Science, Google Scholar, PubMed and 20,000 other sites

Web of Science

The screenshot shows a search result on the Web of Science platform. The title is "Flagellar and twitching motility" by O'Toole, GA (O'Toole, GA); Kolter, R (Kolter, R). It is from the journal "MOLECULAR MICROBIOLOGY", Volume 30, Issue 2, Pages 295-304, with DOI 10.1046/j.1365-2958.1998.01062.x. A "PDF Found" tooltip is visible, listing sources: "Your Kopernio Locker" (unchecked), "Publisher Version" (unchecked), "OA alternative" (checked), and "Google Scholar" (checked). A "View PDF" button is at the bottom of the page.

Kopernio Goals

- “Access to sources, not the discovery of sources, is the concern of information-seekers.
 - People lack patience to wade through content silos...They expect seamless access to resources [and] will readily sacrifice content for convenience.”
- Provide researchers with **access to full text** that integrates into their existing workflows– make access part of discovery, as opposed to a separate task.
 - **Increase the reach and impact of library subscriptions** by bringing them to the researchers, where they need them.
 - **Make library budgets go further** by adding free alternatives where no subscriptions are available.

Fibre Optic Sensors for Structural Health Monitoring of Aircraft Composite Structures: Recent Advances and Applications

By: Di Sante, R (Di Sante, Raffaella)

SENSORS

Volume: 15 Issue: 8 Pages: 18666-18713

DOI: 10.3390/s150818666

Published: AUG 2015

Document Type: Review

[View Journal Impact](#)

Abstract

In-service structural health monitoring of composite aircraft structures plays a key role in the assessment of their performance and integrity. In recent years, Fibre Optic Sensors (FOS) have proved to be a potentially excellent technique for real-time in-situ monitoring of these structures due to their numerous advantages, such as immunity to electromagnetic interference, small size, light weight, durability, and high bandwidth, which allows a great number of sensors to operate in the same system, and the possibility to be integrated within the material. However, more effort is still needed to bring the technology to a fully mature readiness level. In this paper, recent research and applications in structural health monitoring of composite aircraft structures using FOS have been critically reviewed, considering both the multi-point and distributed sensing techniques.

Keywords

Author Keywords: fibre optic sensors; fibre Bragg gratings; Brillouin scattering; Rayleigh scattering; lamb waves; structural health monitoring; composite materials; smart structures; aerospace; aircraft

KeyWords Plus: BRAGG GRATING SENSORS; BRILLOUIN GAIN SPECTRUM; EMBEDDED FBG SENSOR; DAMAGE DETECTION; SPATIAL-RESOLUTION; RECENT PROGRESS; DISTRIBUTED TEMPERATURE; WAVELENGTH INTERROGATOR; QUANTITATIVE-EVALUATION; STRAIN-MEASUREMENTS

Viewing full text the Kopernio Locker

The image shows a screenshot of a research article page with several annotations. The article title is "Investigation on the Angle and Spectral Response of the Internal and the External Quantum Efficiency of Crystalline Silicon Solar Cells". The authors are Nils Reiners, Ulf Blieske, and Susanne Siebentritt. The article is from the IEEE Journal of Photovoltaics (2018). The annotations are as follows:

- Link to the Source:** Points to the article title and authors.
- Link to your Locker:** Points to the article title.
- Email to others:** Points to the authors' names.
- Download locally:** Points to the abstract text.
- Export to a Reference Management application:** Points to the abstract text.
- Tags added to PDF & Tags you can add:** Points to the "Add tags" section.
- Viewing tools:** Points to the "Share", "Download PDF", and "Export to EndNote" buttons.

The right sidebar contains the following elements:

- Share:** A green button with a share icon.
- Download PDF:** A button with a download icon.
- Export to EndNote:** A button with an EndNote icon.
- Refer a friend:** A section with a speech bubble icon and an "Invite" button.
- Current tags:** A section with the text "No tags assigned yet."
- Add tags:** A section with tags "Human", "Favourite", "ocean", "plastic ingestion", and a "+ Add tag" button.

The Kopernio Locker

The image shows a screenshot of the Kopernio Locker interface. The interface includes a search bar at the top with the text "Search your locker ...". Below the search bar are several tags: "Human", "Favourite", "ocean", "plastic ingestion", and "+ Add tag". On the left side, there is a navigation menu with options: "Recent", "By Year", "By Journal", and "Archive". The main content area displays a map titled "Marine and Petroleum Geology" with a legend for "S. North Sea Events", "Viking Graben Events", "Moray Firth Events", "Central Graben Events", and "All Events". Below the map, there is an article snippet: "Anthropogenic earthquakes in the UK: A national baseline prior to shale exploit...". To the right of the article, there is a callout box for "Cite this article in the selected style" and another for "Send this article to Archive". At the bottom left, there is a "Refer a friend" section with an "Invite" button. At the bottom right, there is a callout box for "Add Tags to this article".

Some misconceptions about Kopernio

Misconception	Reality
“Kopernio and Clarivate are acquiring user credentials.”	<ul style="list-style-type: none">• The Kopernio plugin encrypts and stores your credentials within your browser in order to help you authenticate. The credentials never touch Kopernio's servers.
Kopernio “can’t be shut off once installed, with the user’s only option to uninstall it if you don’t want it surveilling you.”	<ul style="list-style-type: none">• You can disable Kopernio by going into the settings/extensions menu in your browser.• Kopernio only works on a “whitelist” of academic websites, where it can transparently deliver value to the end user by adding a PDF shortcut link to the page. Kopernio is not interested in, or even aware of, any non-academic websites you browse (e.g. news, email, YouTube, etc.).
“Kopernio sources articles from controversial venues, including ResearchGate and Academia.edu.”	<ul style="list-style-type: none">• Typically, fewer than 1% of the PDFs Kopernio delivers are sourced from ResearchGate and Academia.edu. 80% of the PDFs Kopernio delivers come from publishers directly. 4% come from preprint repositories, and 3% come from PubMed Central.• Just like Google Scholar, when Kopernio activates on Research Gate and Academia.edu, it mostly delivers the version of record from publisher websites to the user.

The Charleston Advisor Readers' Choice Awards* 2019

<https://www.ingentaconnect.com/content/charleston/chadv/2019/00000021/00000002/art00001>

- **Best New Product/Service - Kopernio**
- **Most Improved Product - Web of Science**

*The Charleston Advisor is a peer-reviewed publication with critical reviews of web products for informational professionals.

The Charleston Advisor is now in volume 21, and for the eighteenth consecutive year the journal is sponsoring a series of awards for the best and sometimes most problematic digital products of interest to libraries. The awards are not necessarily limited to services reviewed by *TCA*, but *TCA* reviews (if available) were consulted in the final consideration. These awards are published on an annual basis. Members of the editorial board made the final selections in a September 2019 conference call. Awards are given in a group of standard categories with occasional special one-time categories added as needed.

Best New Product/Service

Inspec Analytics This free add-on to subscribers of the Inspec database on the IET platform (Institution of Engineering and Technology) allows researchers to discover patterns in engineering literature to identify emerging trends and hot topics for research. "We've used semantic technology to connect each element of the literature indexed in our Inspec database, e.g., author, organisation, publication, date, subject keywords etc. to create the Inspec knowledge graph." This is a wonderful analytics tool for multidisciplinary collaboration as well as those working in focused fields. <<https://inspec-analytics.theiet.org/>>

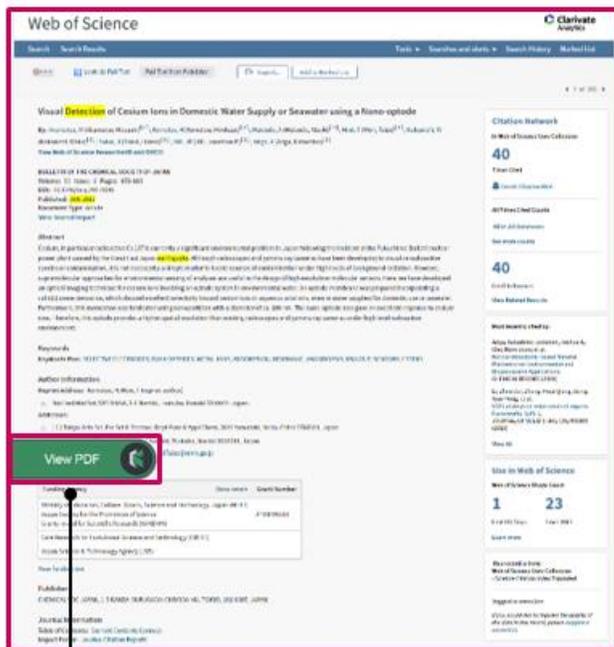

Kopernio As a relatively new product from Clarivate Analytics it provides an important service to make access more seamless by storing your library access credentials in your browser. When using various academic databases "Kopernio searches for full text PDFs and give you one-click access." Kopernio acts as an integrated access tool for licensed and open access content. It replaces, in a significant way, those almost timeless methods of IP access or user ID/password authentication. No doubt others will follow. Kopernio is out of the gate first and thus a best new product. It is free to Web of Science subscribers or can be purchased by others. <<https://kopernio.com/>>

Most Improved Product

Web of Science Clarivate Analytics has made enormous improvements over the past few years in this widely used product by academic libraries. It is widely respected as an independent indexing service with deep coverage across disciplines and has added new emergent literature, open access indicators, and other features of significant interest to academics. <<https://clarivate.com/webofsciencegroup/solutions/web-of-science/>>

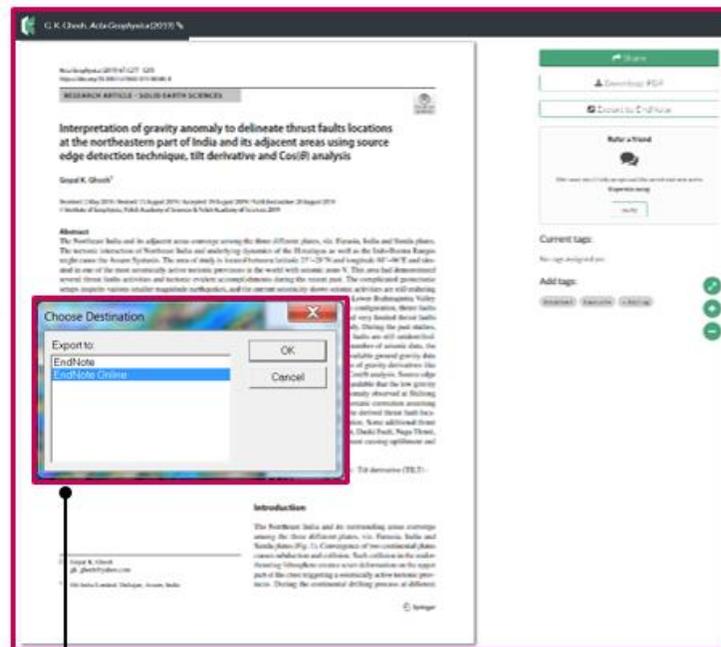

Save time getting full-text PDFs into EndNote

Kopernio on Web of Science

The screenshot shows the Web of Science interface. At the top, there is a navigation bar with links for 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', 'Publons', and 'Kopernio'. On the right side of this bar are 'Sign In', 'Help', and 'English' dropdown menus. Below this is the 'Web of Science' logo and the 'Clarivate Analytics' logo. A secondary navigation bar contains 'Search', 'Search Results', 'Tools', 'Searches and alerts', 'Search History', and 'Marked List'. The main toolbar includes a 'Look Up Full Text' button, a 'Find PDF' button (circled in red), a 'Full Text Options' dropdown, a printer icon, an email icon, a 'Save to EndNote online' dropdown, and an 'Add to Marked List' button. The main content area displays an article record for 'Quicksilver: Fast predictive image registration - A deep learning approach'. The authors listed are Yang, X (Yang, Xiao), Kwitt, R (Kwitt, Roland), Styner, M (Styner, Martin), and Niethammer, M (Niethammer, Marc). The journal information includes 'NEUROIMAGE', 'Volume: 158', 'Pages: 378-396', and 'DOI: 10.1016/j.neuroimage.2017.07.008'. The document type is 'Article'. On the right side, there is a 'Citation Network' section showing '15 Times Cited' and '15 in All Databases'. A large grey arrow points from the 'Find PDF' button towards the explanatory text on the right.

Enable your WoS users to see a new 'Find PDF' button with Kopernio branding appearing on the article record page.

When a user clicks this button they will receive a modal popup that explains Kopernio. Proceeding will take them to Kopernio.com where they will be taken through the usual onboarding flow.

Kopernio Expands to Show Link Resolvers

Following requests from libraries to integrate with aggregator content and interlibrary loan systems we are happy to announce **Kopernio's new ability to integrate with library link resolvers.**

Keep looking for PDF?

Click here to check other access options from Clarivate Analytics Library

Clicking on the icon will take you outside of the regular one-click PDF access flow and into the library's link resolver.

These are typically configured to show all the libraries access options including (aggregator holdings, inter-library loans and document delivery services).

Get in touch with us if you would like to get it set up for your institution.

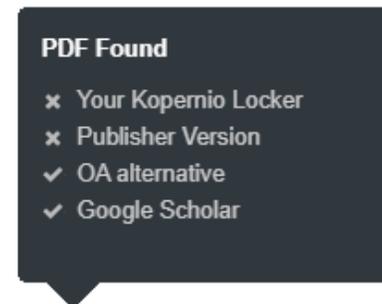

Kopernio Expands to Show Link Resolvers

libraries@kopernio.com

When Kopernio is able to find at least one version of the PDF, it displays the green indicator.

This can be clicked to view the PDF in the Locker.

Hovering over the indicator shows where Kopernio found PDFs.

PDF Found

- × Your Kopernio Locker
- × Publisher Version
- ✓ OA alternative
- ✓ Google Scholar

View PDF 

When Kopernio is not able to find at least one version of the PDF, it displays this new indicator.

When this is clicked, the site's preferred solution is actioned.

Hovering over the indicator shows the site's preferred message.

Keep looking for PDF?

Click here to check other access options from Clarivate Analytics Library

IIQ 

Kopernio Premium Signup Links for Institutions

Benefits to Your Institution

- ✓ Simpler signup process for affiliated users.
- ✓ Enhanced experience for referred users.
- ✓ Increased generation of institutional-level data for reporting purposes.

Benefits to Your Users

- ✓ Easier signup process.
- ✓ Free premium account upgrade.
- ✓ Increased storage and improved integrations (e.g. Dropbox support).

Share your institution's premium signup link:

kopernio.com/try/REPLACE

(exclusively for Web of Science customers)

Plus all the regular benefits of the Kopernio plugin:

- Supports existing authentication technologies and reporting standards (e.g. COUNTER).
- Increased ease of access to entitled content and OA alternatives supplement
- Access at the point of discovery – integration with leading discovery platforms including WoS, plus link resolver integration.
- Provides secure one-click access to the best legal version of a research article.
- Works across 20,000 discovery platforms and relevant scholarly sites.
- Integrates with other workflow tools (Endnote, Zotero, Mendeley).

Web of Science Kopernio Institutional Dashboard

- Publisher-neutral usage insights helping you to understand, manage and improve content flows and access.
- Activity from the Kopernio workflow plugin for all affiliated users, enhanced with leading Web of Science datasets.

Web of Science KID Institutions

- Set proxy/authentication details
- Link resolver integration
- User number reporting
- In-plugin acknowledgement
- Extensive usage analytics enhanced with WoS data sets
- In-plugin messaging
- User growth tracking
