

# ICE Publishing

ICE Publishing is a leading provider of information for researchers and practitioners worldwide in the fields of civil and environmental engineering and materials science. Our wide range of journals, archives and books provide real world impact and a gold-standard reference point for industry and academia. They make up the most comprehensive civil engineering portfolio in the world.

# ICE journals

Available individually or as a collection, our journals provide academics, students and practitioners with the latest developments in the fields of civil engineering, construction and materials science. With civil engineering shaping so much of our daily lives, these journals are not just relevant for civil engineering departments, they cross into many other aspects of the physical and social sciences.

## 2022 highlights:

- ICE Virtual Library usage was 10% higher than in 2021
- 13 journals received their highest ever impact factor
- Flagship geotechnical journal Géotechnique improved upon its already high impact factor to achieve a record value of 5.554 33/35 journals indexed in Scopus
- All journals indexed in Compendex on Engineering Village
- Launched new SDG Resource Centre and UN SDG keywords for papers.

# ICE eBook Collections

The most substantial civil engineering eBook collection in the world, our books provide a forum for dialogue between the worlds of research and practice. Our authors are leading subject matter experts and our eBooks provide a comprehensive source of specialist information for everyone involved in civil engineering and construction. There is coverage of global cases to support best practice. Our comprehensive portfolio of eBooks includes reference works, edited collections, manuals, specifications and best practice guides. Providing complete coverage of all major disciplines in the field, we also publish titles covering recent developments and emerging subject areas, including flood resilience, temporary works, BIM, structure and building design, urban planning, professional practice and modern construction methods.

- Unlimited simultaneous users
- No DRM
- Supports Shibboleth and Athens for ease of access
- COUNTER compliant usage reports to aid decision making
- Free MARC records for cataloguing eBook content
- Library branding available
- Secure archiving with Portico
- OpenURL links and DOIs at title and chapter level.

## Topics included:

- Contracts, Finance and Law
- Energy
- Engineering History
- Environment
- Eurocodes
- Ground Engineering
- Management
- Structures and Buildings
- Transport
- Water and Waste Water.

# ICE Virtual Library

Hosted on Atypon's Literatum platform, ICE Virtual Library is the exclusive home of all ICE e-content and the world's most comprehensive online engineering resource. It delivers trusted, authoritative information on all aspects of civil engineering and materials science including:

- The largest civil engineering eBook collection in the world
- 19 specialist engineering journals (ICE Proceedings collection)
- 11 leading research journals such as Géotechnique and Magazine of Concrete Research
- 5 innovative materials science journals (ICE Science)
- 1 gold open access journal, Geotechnical Research
- Journal archive dating back to 1836.

Supported by enhanced platform functionality, it has a powerful integrated search function, user-friendly design, and full-text features across four centuries of definitive research. Users can sign up for alerts, as well as save their favourite articles, chapters and searches.

## Benefits for librarians:

- Librarian toolkit to promote access
- No platform/access fees
- No DRM
- Perpetual access to subscribed content
- Supports Shibboleth, Azure and Athens for ease of access
- COUNTER compliant usage reports to aid decision making
- Free MARC records for cataloguing eBook content
- Library branding available
- Secure archiving with Portico
- OpenURL links and DOIs at title, article and chapter level
- KBART records for easy listing and display
