Finding Funding

The University of Arizona provides a variety of tools and resources to assist faculty, students, and staff to identify funding opportunities for research, creative, and scholarly activities. Access to Pivot is provided by RII using a UA Arizona NetID. Pivot combines the most comprehensive, editorially maintained database of funding opportunities with a unique database of 3 million pre-populated scholar profiles. For assistance using Pivot or for other help finding funding for your research interests, contact Research Development Services: resdev@email.arizona.edu.

Research and Proposal Development Resources

The Office of Research and Faculty Development (RFD) provides resources and services to University of Idaho faculty that enhance their success and productivity, with the goal of growing U of I's research enterprise.

Whether you're creating a research plan, searching for funding, or developing competitive proposals of any size, our proposal development specialists can help. Contact us for more information or to request our services.

Limited Submission Opportunities

RFD manages the review process for limited submissions (see policy here). For information about current limited submission opportunities, please visit the InfoReady Review page.

Resources for Researchers

It can be difficult to know where to start when navigating the requirements for a new grant. It is prudent to start within your department to ensure that they will support your application. Contact your department head, dean and/or associate dean of research to discuss your plan, and get feedback. If your research plan is not yet ready for major granting organizations, you should also explore the University's **internal funding opportunities**, which are designed to help lay the foundation of major research projects. You may also be eligible for faculty-specific seed funding programs, matching funds or other awards to support the development of new proposals. Before completing the application, be sure to have well-thought-out objectives and a clear research plan. This will make the process of preparing your application to proceed more smoothly.

Grant Title	MAGIC-SWITCH: Magnetic Switch Controlled with Voltage
Funder	European Research Council (ERC)
Award Id	875018
Dates	2019-01-12 - 2021-05-31
Amount	€150,000 EUR
Investigators	Jordi Sort
Abstract	We are living in a world that is increasingly driven by data. Governments, healthcare facilities, commercial businesses and individuals are all storing information in electronic form. This has led to the emergence of digital and cloud-based technologies. The ability to use information more efficiently has resulted in a rapid increase of the value of information. However, with the Big Data revolution, information is facing new challenges. Energy efficiency during writing of magnetic information needs to be improved. Thus, enhancing robustness in data storage systems is one of the major challenges in our modern society. Our vision for the near future is to turn the scientific output of the ERC Consolidator SPIN-PORICS into a new type of storage memory. MAGIC-SWITCH will deliver the prototype and business case for a new type of compact storage memory, at an industrial-relevant scale. The specific goal of this PoC project is to take the initial steps towards this vision by building a prototype (moving from Technology Readiness Level TRL 3 to 5), standardizing its manufacturing process and creating a business case for its commercial exploitation (including a pitch that can be used to close new partnerships or in fund-raising).
