

## Unlock a smarter way to search biomedical literature with Embase and Embase AI.

Access extensive biomedical content, discover evidence you might otherwise miss, and leverage AI-driven tools to accelerate your research.

**When? 11 June at 11:00 CEST or 16 June at 12:00 CEST**

**Where?** Teams, register [here](#) or Zoom, register [here](#)

- **Accelerate your research with Embase and Embase AI**
- In this training session, you will learn how to:
- Search biomedical literature effectively and make the most of advanced filters
- Use PICO, PV, and Medical Device search forms
- Translate PubMed queries with the PubMed Translator
- Leverage AI-powered search and Natural Language Querying (NLQ)
- Discover related content through triple linking
- Manage, organize, and export search results efficiently
- This session is designed to help researchers save time, improve search precision, and gain deeper insights from the biomedical literature.
